THE INSIDE
EDGE

MUSTO THE INSIDE EDGE

Musto was established in 1964 by Keith Musto. This world-renowned Olympic sailing silver medallist noticed a gap in the market for high-performance apparel when competing in the Tokyo Olympic Games.

Since then, the brand has pushed the boundaries of design and manufacturing.

INNOVATE TO INSPIRE

Musto's collections stand proudly at the forefront of product innovation and design.

Its high-performance apparel has been used in some of the most extreme conditions on earth. From punishing Southern Ocean conditions to the brittle cold of the North Pole. Over the years, Musto has used the insight gained from its high performance inshore and offshore sailing product range to inform the designs of its country and adventure collections.

Musto was recently chosen as the brand of choice by the leading sailors worldwide and selected as an official partner by the top Olympic sailing nations. Awarded two highly coveted Royal Warrants. Sold in over 40 countries. And worn by 70% of the teams competing in the last Volvo Ocean Race. Musto is the clear choice of champions.

**WHEN A SAILOR
IS PROTECTED ON
THE OUTSIDE, THEY
ARE STRONGER ON
THE INSIDE.**

**MUSTO GIVES
SAILORS THE
INSIDE EDGE.**

**SO THEY CAN
GO BEYOND
AND SUCCEED.**

WHEN IT MATTERS MOST

Providing Sam Davies with the inside edge
in the toughest conditions on the planet.
Stronger. When it matters most.

#TheInsideEdge

I MUSTO PEOPLE

Musto's ambassadors are the best at what they do. They've tamed hostile conditions long enough to emerge victorious. They've recognised the hurdles in front of them and jumped them. They've seen corners of the world, that exist only in our imaginations, first-hand. These ambassadors trust Musto kit to take them from one achievement to the next. There's no better endorsement than that.

GORE-TEX
3-LAYER GORE-TEX PRO WITH OCEAN TECHNOLOGY AND A GORE™ MICRO GRID BACKER SET THE STANDARD. THE ULTIMATE BREATHABLE, WATERPROOF AND DURABLE PROTECTION FOR PROFESSIONAL SAILORS

Punishing Southern Ocean conditions mean that sailors in the Volvo Ocean Race, Vendée Globe and aboard record-breaking multihulls demand only the best performance from their kit. It is these sailors, who are experienced in battling the worst conditions on the planet, that drive Musto innovation. Their direct feedback informs each innovation in Musto's pioneering HPX collection.

Evolving with and beyond the challenges faced in the Volvo Ocean Race, Musto's development of HPX takes into account every detail. Every feature works in harmony, allowing sailors to stand against the most relentless ocean waves with complete confidence.

WHAT IS GORE-TEX FABRIC?

GORE-TEX fabrics are created by bonding a fully waterproof GORE-TEX membrane between high-performance textiles. The result is a fabric that offers a combination of high levels of breathability and total waterproof protection.

The GORE-TEX membrane is the heart of all the GORE-TEX products. Completely wind and waterproof, the membrane is also

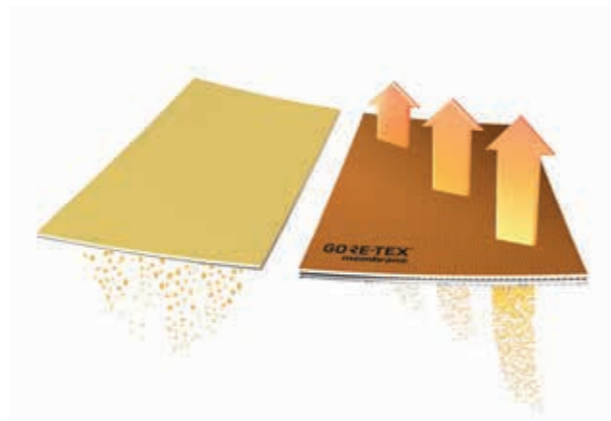

permeable to allow water vapour from the skin to escape with ease. The result: water from the outside will never penetrate. Cold winds cannot pass through. And perspiration can escape easily. Dryness and comfort are assured in GORE-TEX products.

HOW DOES IT WORK?

WATERPROOF

A GORE-TEX membrane is comprised of microscopic pores 20 times smaller than a drop of water, which prevents water passing through.

BREATHABLE

Pores in the GORE-TEX membrane are 700 times bigger than a water vapour molecule, allowing water vapour to easily pass through the membrane, keeping you dry and comfortable.

WINDPROOF

The GORE-TEX membrane has been engineered to be durably windproof. It blocks wind chill that can lower the temperature of your core while allowing your skin to breathe.

DURABLE

Other fabrics weaken with wear or washing. GORE-TEX fabrics are designed to withstand the rigours of both to maintain performance across the useful life of the product.

THE BENEFITS OF GORE-TEX

- 100% WATERPROOF
- OPTIMUM BREATHABILITY
- WINDPROOF
- LIGHTWEIGHT
- INCREDIBLY DURABLE, EVEN IN THE HARSHTEST CONDITIONS

First created in 1995 after the development of the pioneering HPX the previous year, MPX first incorporated GORE-TEX fabric in 1998. The range broke new ground on the way to becoming popular in the yachting world amongst racing and cruising sailors alike. MPX now takes another significant step in its journey as it is refined further to meet the demands of the modern-day sailor.

MPX sets the standard, you set the pace. Categorized into Offshore, Race and Coastal, the collection offers comprehensive and reliable protection across the spectrum, with specific details designed to benefit each type of sailor.

REASON TO RACE

MUSTO

TECHNICAL CLOTHING PARTNER

MUSTO IS PROUD TO BE AN OFFICIAL PARTNER TO THE INCREDIBLE CLIPPER RACE.

Defining itself as a race without equal, the Clipper Race is a peerless endurance test. Traditionally, challenges of these epic proportions were reserved for seasoned sailors. But when Sir Robin Knox-Johnston, the first person to sail solo, non-stop, around the world realised the life-changing impact that such a feat could have on people, he created an event that would open the opportunity up: the Clipper Race. With no previous sailing experience required from its participants, the record breaking event features a 40,000 nautical mile course, around the world, on a 70-foot ocean racing yacht.

|| The sea does not distinguish between Olympians or novices. There is nowhere to hide - if Mother Nature throws down the gauntlet, you must be ready to face the same challenges as the pro racer. Navigate the Doldrums en route to South America, endure epic Southern Ocean storms, experience South African sunsets, face the mountainous seas of the North Pacific - and bond with an international crew creating lifelong memories before returning victorious. ||

14-metre-high waves, hurricane force winds, boat speeds up to 35 knots (the equivalent of 40 mph), extreme heat and freezing conditions.

GEARING UP FOR THE CHALLENGE

To ensure that every sailor is protected in these formidable conditions, Musto has put together a recommended kit list to coincide with its pioneering 3-layer system.

To summarise the system for the Clipper Race, the outer layer needed to be highly protective, safeguarding sailors against the elements while keeping them visible.

Garments featuring GORE-TEX supply this ultimate all-weather protection whilst being supremely breathable, making Musto's pinnacle HPX Collection, featuring GORE-TEX, highly suited to active sailors.

Mid-layers such as the Frome Mid-Layer Fleece Jacket keep sailors temperate in warm to fair conditions, while wicking merino base layers supply superior next-to-skin comfort that keeps skin dry and comfortable.

An incisive knowledge the ocean combined with the brand's expertise in cutting-edge designs is why these inspiring sailors are trusting in Musto to keep them protected as they embark on this life-changing event.

There is little that is more compelling than the race itself aside from the stories of the people undertaking this impressive challenge. Musto's #ReasonToRace campaign aims to uncover the very human stories that inspired these novice and experienced sailors to board their boats and sail away from the familiar.

With more people having climbed Mount Everest than circumnavigated the planet, the inspiration that has set these sailors out on a trajectory into the unknown was a true shift in their consciousness. Donna Von Tunk, an Australia-born 47-year-old chiropractor from Bedfordshire, for

example, couldn't have known the life-changing consequences speaking to two of the Clipper 2015-16 Race Crew would have.

"A fire was lit and my enthusiasm for this race took off," Donna admits. "By January 2018, I had my interview and signed up for the 'race of my life'. Being immersed in Mother Nature at her most powerful, raw and remote had a strong appeal.

Every Clipper Race crew member will need to pass each of its four gruelling levels of training. Preparation is key. The last edition saw race teams battle 'phenomenal sea states' with

MUSTO
BR2

BR2 is a Musto waterproof rating for fabric. The fully seam taped construction of BR2 rated garments ensure you stay dry and comfortable even in torrential rain over prolonged periods. Musto determines the waterproofness of its fabric using a hydrostatic waterhead. This is measured by pulling the fabric tightly over a tube. The tube is then filled with water until water begins to leak through the fabric after a 24 hour period. The height of

the water column, in millimetres, is the hydrostatic waterhead measurement. Even after the fabric has been washed five times, BR2 has a minimum hydrostatic waterhead of 10,000mm and up to 15,000mm. This is a significantly higher waterproof rating than the industry minimum of 1,500mm. BR2 fabrics also allow 7,000g of moisture to pass through it, giving it a breathability rating of 7,000g/24hrs.

MUSTO

BR1

Musto tests how waterproof its fabric is by using a hydrostatic waterhead. This is measured by pulling the BR1 fabric tightly over a tube. The tube is then filled with water. The amount of water that leaks through the fabric after a 24 hour period is then measured. The height of the water column, in millimetres, is the hydrostatic waterhead measurement.

Even after the fabric has been washed five times, BR1 has a minimum hydrostatic waterhead of 5,000mm up to 10,000mm. This is a significantly higher waterproof rating than the industry minimum of 1,500mm. BR1 fabrics also allow 5,000g of moisture to pass through it, giving it a breathability rating of 5,000g/24hrs.

THE NEW GENERATION OF SAILOR

Musto is a proud partner to the British Sailing Team and British Youth Sailing Teams: The Royal Yachting Association's specialist programmes dedicated to developing and retaining the best racing sailors in the United Kingdom. By using a network of elite coaches and support staff and exposing them to all

conditions, it trains sailors to be resilient and excel under pressure.

British Youth Sailing aims to supply the British Sailing Team with talented athletes equipped with the potential to win Olympic medals. In fact, many of the country's best known and most successful Olympic sailors are products of the British Youth Sailing programme.

Such ambition must be met with kit that can meet the breadth of its demands. Enhanced durability. Exceptional versatility for training and competing from season to season. And superior freedom of movement, for kit that keeps pace with the new generation of sailor.

"Musto is a quality brand that shares British Youth Sailing's values and behaviours. Its much-loved products ensure that our young sailors look smart, feel good and get the performance they need from their clothing"

Ian Walker,
RYA Director of Racing.

OVER 5 TRILLION PIECES OF PLASTIC CURRENTLY LITTER THE OCEAN

The Ocean Cleanup estimates that over 5 trillion pieces of plastic currently litter the ocean. Plastic and rubbish collect in five ocean garbage patches, the largest one being the Great Pacific Garbage Patch, located between Hawaii and California. This plastic impacts our ecosystems, health and economies. Resolving it requires a combination of closing the sources and cleaning up what has already accumulated in the ocean.

Spurred on by this vast pollution and its destructive effect on the ecosystem, this organisation has embarked on the largest cleanup in history. Their ambitious objective has resulted in the development of advanced technologies: passive systems that use the ocean currents to funnel plastic into an artificial coastline where it can be collected and recycled.

To assist their engineers in assessing the functionality of the barrier, Musto has supplied them with its most resilient kit, to ensure they are fully protected.

THE 3-LAYER SYSTEM EXPLAINED

Your environment influences your attire - this should never be truer than when you're out at sea. A 3-Layer System is the most effective way to ensure insulation and protection against the elements while maintaining the freedom of movement you need to perform. Pioneered by Musto, this system has since become the standard for the global sailing market as a result of its efficient thermoregulatory properties. Working on the premise that water transmits heat up to thirty times faster than air, the key principle behind our system is to keep the body as dry as possible.

BASE LAYER

As the layer closest to your skin, a base layer must wick moisture away to minimise heat loss. It also needs to provide enough ventilation for you to remain comfortable during periods of exertion out on the seas.

MIDDLE LAYER

The mid layer builds on the temperature regulation provided by the base. Its main purpose is to insulate, trapping dry, warm air and holding it close to the body.

OUTER LAYER

From torrential rain to icy waves, you're at the mercy of the elements when you're sailing. An outer layer is your primary defence against the weather.

Your environment and the type of activity you are engaged in are two of the key factors that will inform your layering choices. You may find yourself requiring every layer from base to outer. However, on a leisurely sail around the marina on a fair day, a base layer would suffice, perhaps with a mid-layer over the top in case the temperature drops.

It's always wise to understand the importance of your base layer - there is a misconception in the sailing world that a run-of-the-mill t-shirt can make a good base. However, a standard cotton t-shirt does not have odour control properties, UPF protection, it isn't fast-drying nor does it have sweat-wicking properties. When highly active, cotton sticks to your skin and increases in weight when

wet. Your base layer is synonymous to comfort, so understanding them is incredibly important, especially when spending long periods of time on a boat.

No two base layers are the same - their design and the fabrics qualities have been chosen according to their purpose. For example, if you are going to be highly active in very cold conditions for long periods of time you would be best suited to wearing an active base layer. These garments are body mapped to help regulate body temperature, they have antibacterial NILIT body fresh technology to minimise body odour and the seamless construction eliminates chaffing. On the other end of the scale if you are highly active in hot conditions and are likely to meet spray from the

water, you would be better suited to a quick-dry base layer. These garments provide UPF protection, offer 4-way stretch and are sweat-wicking and fast-drying. The seams are also welded to eliminate chaffing.

A good mid-layer should offer breathability and warmth depending on your level and type of activity. Sailors, who are out at sea in changeable and extreme weather conditions should look for GORE-TEX in their mid-layers, as well as fleece linings. If sailing in fair weather, opt for a thermal fleece mid that also has a DWR finish for additional protection against the elements.

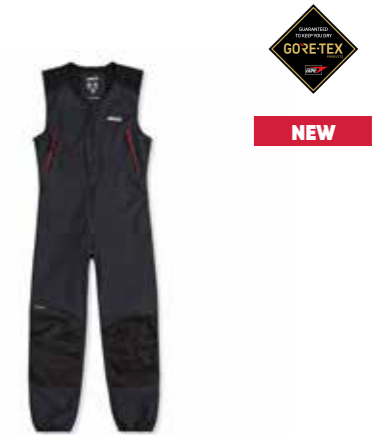

5 TIPS FOR CHOOSING A MID/BASE-LAYER

- 1 DO YOUR HOMEWORK**
every activity has different demands
- 2 CHECK THE PERFORMANCE**
of the garment fabric fulfills your needs
- 3 GET THE RIGHT FIT**
to enable the product to perform at its best
- 4 CHECK THE FABRIC QUALITY**
not all fabrics are created equal
- 5 ADHERE TO THE WASHING INSTRUCTIONS**
to prolong the fabric's quality and performance

BASE-LAYERS

Choosing the correct base-layer for the climate and level of activity you face will make a world of difference to your comfort on the water. As the layer closest to your skin, a base-layer is the foundation of the 3-layer system and must wick moisture away to minimise heat loss. It also needs to provide enough ventilation for you to remain comfortable during periods of exertion out on the seas.

MUSTO BASE-LAYERS EXPLAINED

Considering your environment is essential to your comfort on the water. Paired with a breathable mid-layer and an outer layer, the base layer is the foundation of the 3-Layer System. Choose the right layers for the climate and your level of activity to keep dry, comfortable and maintain your optimum core temperature so you can spend longer on the water.

THERMAL BASE LAYER

Wear this base layer for thermal insulation during medium energy activities in freezing conditions. Lightweight and ergonomically fitted, it is streamlined under your layers. The fast wicking, low absorption fabric keeps you dry and comfortable as you exert energy. Stay warm in this thermal base layer that regulates your temperature on winter adventures.

ACTIVE BASE LAYER

Wear this base layer for high-energy activities in cold to freezing temperatures. Wicking fabric technology keeps you dry and body mapped variable knits regulate your temperature. The stretch fabric gives you complete freedom of movement while different knits reduce the risk of injury by supporting muscles and joints. Antibacterial NILIT® BodyFresh technology minimises odour to keep you fresh during periods of exertion.

MERINO BASE LAYER

Wear this base layer for high-energy outdoor adventure in freezing to mild climates. Merino wool is the pinnacle of natural fibres for active wear - moisture and temperature regulating, naturally anti-bacterial for odour-resistance and incredibly soft too. You can wear it for days without it smelling. Unique wool fibres wick moisture away from the body to keep you dry and comfortable, trap vital warmth in cold climates and regulate your temperature as you heat up with exertion.

QUICK DRY BASE LAYER

Wear this base layer in hot climates in low to high-energy activity. It provides UPF40 protection from the sun's harmful UV rays. Stay dry and comfortable with the wicking and fast drying fabric that has 4-way stretch for complete freedom of movement. Welded and flatlocked seams and super lightweight, silk touch fabric make this base layer barely felt against your skin.

EVOLVE. ADAPT. PERSIST.

Evolution is a progressive force. It moves forward, taking only the strongest with it. It defines the very pinnacle of a moment. Musto's evolution is just as relentless. Its approach to innovating premium sportswear is uncompromising. And its aim is to ensure that every outdoor enthusiast experiences the pinnacle of performance while wearing it.

Musto Technical Lifestyle products. United in their ability to keep you supremely comfortable. So you can focus on being the best version of you.

THE BENEFITS OF XVR

- COMPLETE VERSATILITY: LAYER UP WHEN COLD, EFFORTLESSLY SHED LAYERS WHEN YOU NEED TO COOL DOWN AND STAY DRY
- A WIDE RANGE OF COLOURS FOR CUSTOMISABLE STYLE
- UNCOMPROMISED WEATHER PROTECTION
- MUSTO'S INNOVATIVE H-BOND™ ZIPPING SYSTEM SUPPLIER COMPLETE INTERCONNECTIVITY AND A STREAMLINED FIT

MUSTOXVR

Whether you're training or being active outdoors, you need insulation when temperatures plummet and the flexibility to cool down and stay dry as you exert yourself. Seeing this need for versatility in the sportswear market, Musto has integrated its exceptional XVR, or crossover technology, into key styles across its collections. This ensures a bespoke layering system with the freedom to effortlessly layer up or down. All while remaining protected against the elements.

Musto's innovative H-Bond™ zipping system supplies complete interconnectivity, bonding separate pieces into a single, insulated garment. This allows outer shells and insulating mid-layers to be combined together in a completely customised formation while loops in the hood and cuffs ensure a tailored fit.

So choose your shell from a range of colours then choose your insulation. Wear them separately or as one. Cross them over for a whole new jacket.

SUNBLOCK AND UV PROTECTION

Engineered to protect you from the harmful UV rays, this range of Sunblock tops feature UPF40 protection. Flatlock seams make these base layers incredibly comfortable, with freedom of movement delivered by raglan style sleeves. Complement these tops with Musto's bestselling Evolution Performance UV trousers and shorts for sea and land. Made from fast-dry, stretch and reinforced fabrics, you'll always perform at the top of your game. Lightweight and durable, they'll stand up to the rigours of the boat and work in the marina.

FOOTWEAR

Highly specialised footwear designs ensure tailored performance from the deck to the city. Musto's highly engineered technical footwear collection epitomises performance sailing footwear. Using salt-resistant leathers and insole drainage systems, the line supplies hardwearing comfort when you need it most. Continued innovation also sees more Musto-engineered compounds and designs that showcase its heritage of sailing expertise that results in exceptional comfort. Because when you're comfortable, you're performing.

PRODUCT CARE

MAKING YOUR KIT LAST LONGER

AT MUSTO WE ARE COMMITTED TO DELIVERING THE VERY BEST PRODUCTS AND SERVICES.

GORE-TEX clothing carries a GUARANTEED TO KEEP YOU DRY promise: "If you are not completely satisfied with the waterproofness, windproofness or breathability of your GORE-TEX product then we will repair it, replace it, or refund your purchase price." We uphold this promise in our GORE-TEX products. In addition, at Musto we offer a guarantee on products that carry our Musto Promise tag for the reasonable working life of the garment. We also offer repairs for a small fee on wear and tear and damage.

You can also make your kit unique with personalisation. Visit www.musto.com/team-sales for more information.

CUSTOMER SERVICES AND TECHNOLOGY

At Musto we are committed to looking after you and your Musto products long after you leave our store. That's why everyone keeps coming back. We want to provide not only the very best products, but also the very best services.

"I'd like to point out two things that Musto are exceptional at doing. First being their excellent products they bring to the market and second their incredible customer services."

CHARLIE W.

PERSONALISATION

You can make your kit unique with personalisation. Embroidery and printing is available on most Musto products so you can have your name, your boat name or sponsor name and logos on hats, tops, jackets and bags. Make it your Musto. Visit www.Musto.com/team-sales for more information.

"Many thanks once again to you and your team, the service has been consistently first class."

GARRETH W.

REPAIRS

Does your well-worn sailing kit need some care and repair? Have you snagged your jacket at the marina? We offer repairs of all kinds for a small fee on wear and tear and damage to your Musto products. Simply contact customer.services@Musto.com

"I was expecting to pay considerably more [for the zip repair]. It proves to me that it is well worth paying a bit more for a quality British product."

GRAHAM H.

SHIPPING

If you shop online, we will ship your order for free on orders over £25 to mainland UK addresses and we ship internationally to over 40 countries. Or, find your closest store at www.Musto.com/store-locator

"Thanks a lot, you're great! Really super service, I'm really happy."

J. PONTIER

GORE AND MUSTO GUARANTEES

Every GORE-TEX product in our range – be that a jacket, middle-layer, bag, glove or hat – goes through rigorous waterproof testing at Gore headquarters before we bring it to you. They ensure that every one of our GORE-TEX garments stands up to their exceptional standards so they can guarantee the GORE-TEX products we make.

GORE-TEX GUARANTEED TO KEEP YOU DRY promise: If you are not completely satisfied with the waterproofness, windproofness or breathability of your GORE-TEX® outerwear then we will repair, replace or refund your purchase price. We at Musto will handle this on your behalf.

In addition, at Musto we offer a guarantee on products that carry our Musto Promise tag for the reasonable working life and use of the garment.
