# EXPERIENCE DRY COMFORT

SOCKS · GLOVES · HATS

└ └

Our technology allows you to  
**GO BEYOND THE WEATHER**

---

Somewhere, it's cold and rainy. Playing outside shouldn't mean compromising comfort to stay dry and warm. DexShell's outdoor accessories -- socks, gloves, and hats, keep your body moving with waterproof, warm, breathable, and comfortable technology.

---

**100% WATERPROOF  
HIGHLY BREATHABLE  
4-WAY STRETCH**

DexShell's waterproof accessories feature a Best-in Class three-layer proprietary lamination technology. The outer shell is typically knitted from wear-resistant, easy-drip-dry yarns.

The inner layer is knitted with performance yarns such as COOLMAX® FX, **drirelease**®, or merino wool to match the activity for which it's best suited. The composition of inner layer is designed to adjust to the microclimate next to the skin providing comfort even in the most extreme conditions. Sandwiched between these two layers is a high tech Porelle® membrane which provides the excellent waterproof and breathable performances our apparel is known for.

Inner glove: 43% merino wool, 43% anti-pilling acrylic,  
14% nylon.

A new generation of seamless waterproof gloves with a terry loop inner layer for enhanced warm performance. They are suitable for a variety of outdoor activities where there is a need to keep hands warm and dry with excellent dexterity.

## CAMOUFLAGE GLOVES

Merino wool inner

Code: DG726

Size: S, M, L, XL

Colour: Camouflage

Outer glove: 84% nylon, 2% elastane,  
14% elastics.

Interlining: Porelle® membrane.

Inner glove: 37% merino wool, 37% anti-pilling acrylic,  
18% nylon, 8% elastics.

The DexShell camouflage glove is suitable for a full range of outdoor activities including hunting, military, and tactical applications that need waterproof and breathable performance. They also provide concealment from easy observation and detection.

## FLAME RETARDANT GLOVES

Cotton inner

Code: DG438

Size: S, M, L, XL

Colour: Charcoal

Outer glove: 82% para-aramid,  
8% elastane, 10% elastics.

Interlining: Porelle® membrane.

Inner glove: 91% cotton, 9% elastics.

Using a waterproof breathable Porelle membrane as the technical barrier and with the outer layer knitted from the flame retardant, cut-resistant Para-aramid yarns, the DexShell FR gloves have been developed for protection against burning and mechanical injuries in any working conditions. They meet the EN407 and EN388 standards and are CE certified.

Natural COTTON

## **TOUGHSHIELD GLOVES**

COOLMAX® FX inner

Code: DG458N

Size: S, M, L, XL

Colour: Charcoal

Outer glove: 65% para-aramid, 15% spun steel,  
8% elastane, 12% elastics.

Interlining: Porelle® membrane.

Inner glove: 65% COOLMAX® FX yarns, 35% nylon.

This is a fantastic glove that combines waterproof breathable performance with cut resistant protection. It is also touchscreen compatible. Suitable for a wide range of activities wherever you need the performances.

## **TECHSHIELD GLOVES** (touch screen)

COOLMAX®FX inner

Code: DG478TS

Size: S, M, L, XL

Colour: Grey

Outer glove: 55% UHMWPE, 5% conductive yarns,  
20% nylon, 6% elastane, 14% elastic.

Interlining: Porelle® membrane.

Inner glove: 65% COOLMAX®FX yarns, 35% nylon.

A 'magic' waterproof yet breathable glove with the abrasion resistant performance. The touchscreen design at the thumb and index finger works well on smartphone, ipad, and other devices. Meet EN388, EN420 standards, and get CE certificate.

Interlining: Porelle® membrane.

Liner: Micro fleece fabric.

This windproof, waterproof, yet breathable beanie hat is engineered with DexShell's seamless waterproof technology. The twin pompom style adds a bit of fun to chilly, wet weather.

# WE use the Premium materials.

DexShell goes beyond being a range of waterproof gear for wet weather protection. The DexShell products are a selection of stylish yet technical accessories made from a variety of premium materials, designed to handle a multitude of uses and environments. The following premium materials are used....

**Porelle®** - PORELLE® waterproof breathable membranes have been engineered for lamination to create high performance apparel for a range of market applications.

Porelle® membranes are manufactured by PIL Membranes Ltd, with over 30 years' experience in the market place. PORELLE® is the registered trademark of KL Technologies Group Limited.

**drirelease**<sup>®</sup> WOOL blend - **drirelease**<sup>®</sup> technology uses an engineered blend of multi-denier, multi-staple length hydrophobic (water-hating) and hydrophilic (water-loving) fibers to keep wearers dry, cool and comfortable. The unique blend of synthetic and natural fibers in **drirelease**<sup>®</sup> yarn actually accelerates the water release rate. Rather than just spreading moisture across the surface, **drirelease**<sup>®</sup> fabrics push water and perspiration to the outside of a garment, releasing them into the air faster than other performance fabrics on the market. The **drirelease**<sup>®</sup> WOOL blend is as warm as 100% wool without the itch. The wearer never feels clammy against the skin. **drirelease**<sup>®</sup> can be found in a wide variety of outdoor and active apparel from many of the world's best brands.

**Coolmax**<sup>®</sup> yarn - COOLMAX<sup>®</sup> is the performance yarn that includes an effective fiber-based moisture management system. The system can move perspiration away from the body, through the fabric, and transfer out of the garment. It can evaporate quickly, allowing the wearer to feel cooler and much more comfortable. COOLMAX<sup>®</sup> fresh FX has the permanent antibacterial performance due to the special treatment by silver-based additive during the production process. COOLMAX<sup>®</sup> is the registered trademark of Invista<sup>®</sup>.

**Merino wool** - Warm, breathable, moisture repellent and anti-static. Merino has the capacity to deal with moisture like no other yarns, absorbing perspiration and releasing it into the air as vapour. It is naturally odour resistant too. Luxuriously soft and gentle against the skin, it reacts to your body's temperature, keeping you warm when it's cold and releasing body heat and moisture when it's hot. The natural elasticity and resilience of Merino wool enables it to spring back into shape with ease.

**Bamboo rayon** - A cellulose fibre which is processed from bamboo crops, the fifth-largest natural fibre after cotton, linen, wool, silk. With good air permeability, fast water absorption, and excellent dyeing features, the bamboo rayon (viscose) has inherent antibacterial, anti-odour, and ultraviolet resistant performances.

# POINT OF SALE SUPPORT...

A highly dedicated team at DexShell have developed a variety of practical marketing items. It strives to make Point of Sale materials to aid consumers and drive retail sales.

- To support the brand profile in stores and attract consumers
- To highlight and communicate the unique features of Dexshell products
- To facilitate making the right choice of products to best suit the consumers needs
- To attract consumers back again through consumer friendly advices

# POINT OF SALE

# Product care and size guide.

## Wash care

DexShell's non-conventional socks and gloves require special care due to their technical composite construction. Improper care will compromise the performance. To avoid leaks, do not puncture the membrane. Socks should be worn inside of boots only. Proper care of your DexShell products will lengthen the life of your products.

### Washing...

DexShell is machine washable below 40°C(108°F), but hand-washing is recommended to prolong the life of the product.

### Drying...

DexShell is not suitable to be dried on any direct heat source such as radiator or iron as the layers may delaminate and split.

Drip dry or tumble dry low.

The followings are wash care instructions:
